

Construction Scheduling

Instructed by John Huesner, Project Manager

Mondays
May 14 & 21

5:00 to 8:00 pm

ABC So-Cal
Training Center

ABC Member \$130
Non-Member \$180
SE - 2 no charge

Learn to develop a realistic schedule, identify critical activities and efficiently schedule other trades.

In this module you'll cover the basics of scheduling from simple 'to do lists' through bar charts, to CPM network diagrams. You will analyze an existing CPM schedule to determine how to shorten the project duration in a manner that will be at the least cost and result in the highest quality to the project.

Reservation deadline is one week prior to the event. There will be no refunds given for cancellations after the deadline.
