NEC REVIEW PREP FOR ELECTRICAL CERTIFICATION

**ARE YOU READY
FOR STATE
CERTIFICATION?**

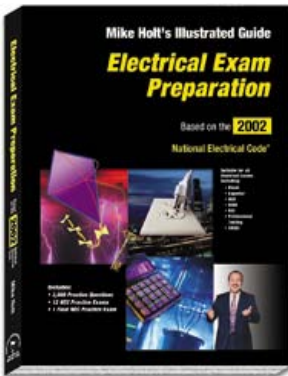

18 Hours of intense instruction using the 2002 National Electrical Code! Use this opportunity to brush up on your skills in the codebook and prepare for the state examination. This class will stress how to correctly use the code book and will be applicable for study.

The following will be covered:

<input type="checkbox"/> Electrician's Math	<input type="checkbox"/> Electrical Circuits
<input type="checkbox"/> Alternating Current	<input type="checkbox"/> Conductor Sizing
<input type="checkbox"/> Protection Requirements	<input type="checkbox"/> Motors and Transformers
<input type="checkbox"/> Raceway and Box Fill Calculations	<input type="checkbox"/> Residential Load Calculations
<input type="checkbox"/> Voltage Drop	<input type="checkbox"/> Residential Calculations
<input type="checkbox"/> Commercial Load Calculations	<input type="checkbox"/> Transformers
<input type="checkbox"/> Hands on Experience in the 2002 NEC	<input type="checkbox"/> Practice Tests

Note: Be prepared for class!! Brush up on Ohm's Law or you will get behind. Everyone must bring a **2002 NEC** and scientific calculator to class.
